Allowance of Application # 09/987,740

1. The following communication is in response to applicant's amendment received 13-December-2005, and the IDS received 3-February-2006. The examiner respectfully acknowledges the cancellation of claim 4. Also, the examiner appreciates applicant's explanation concerning the IDS submitted on 15-January-2002. To ensure that the date of the Japanese publication is correct, the examiner will submit an 892 with the correct information.

Reasons for Allowance

2. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter. The instant application is directed to a non-obvious improvement over the information described in the related prior art, specifically the information cited in the PneuSim Pro brochure. The improvement comprises a simulation result displaying apparatus for a pneumatic device, the pneumatic device including at least a pneumatic cylinder, a solenoid valve, a speed controller, and pneumatic tubes for connecting therebetween, wherein the invention provides means for entering area and effective area values of different components making up the pneumatic system, for use in determining the stroke time and velocity of a piston. This patentable distinction is included in independent claim, no. 1. The art of record, either individually or in combination, fails to teach, suggest, or render obvious the useful, concrete and tangible <simulation of a pneumatic device> having the corresponding structure which is disclosed in the specification and equivalents thereof at least at page 7, line 19 through page 23, line 15, and Figures 1-10. In view of the foregoing, the claims of the present application are found to be patentable over the prior art.
